"The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundred fold, in some cases almost incalculably; unreasonably; and speculation has been rife . . .

(from The American Journal of Numismatics, Vol. 1, No. 1, May, 1866.)

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee.
2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.
3. A fourteen day return privilege is allowed on all purchases. Returns may be made for any reason, or for no reason. My business depends on attracting repeat customers. It does neither one of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been optimistic about the grade. It can happen. But it is not my intention.
4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request. We also accept VISA or MASTERCARD with a 2% charge back.
5. All orders are sent postpaid.
6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced "value" or "net" grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin. I describe these defects and deduct from the technical grade based on their presence. As an example a coin might be described: "1805 S-267 VF20. Sharpness of VF30 with smooth brown surfaces, some light pin scratches where corrosion was removed at K1 reverse." Here is a coin VF30 by ANA standards but with scratches at one o'clock on the reverse.

Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points from the overall grade. The first grade listed represents the net or value grade. Clearly this is an art and elements of subjectivity are inevitable. Where there is no second grade listed it is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase.

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC ratings as compiled in Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings, die state, and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only. Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgements and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

8. Serious collectors, who have formed a discriminating collection over a period of years. Often realize a substantial profit when their collection is ultimately sold. However, coin collecting should not be confused with "investment".

Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose. Coin investment gurus are often more than willing to give advice. Think about it. If you ask a cat which canary to buy remember his primary concern may not be how well it sings. There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a good chance of success.

May 25th started as any other day: a quick shower, a call from home, a cup of mini bar coffee. But 14 hours and 2.8 million dollars later we had experienced the biggest valuable day of early copper ever.

It started with the first Doc Lee lot 1793 C-1 Half Cent in a PCGS EF40 holder. Pretty close to accurate by EAC standards. VF35 would be a conservative grade. This opened about 30% back of grey sheet bid for EF and then was bid to a total \$16,000 (prices include a 15% buyers' premium. (m.o.l.) Not a bad start! Things continued about the same, Lot 66, a commercial UNC 1974 C-1 AU50 EAC grade brought a stunning \$16,000. The three 94 C-1b's brought moderate to soft prices. Lot 78, the rare 1794 C-3b brought \$17,250 - only a couple thousand less than at Frankenfield. But the price then seemed crazy. By today's standards 17K seemed like a bargain for the second finest of only 5 known!

I bought a nice F15 1794 C-7 (not one of Doc Lee's coins, but from an eastern consignor) for a reasonable \$5750. Then we watched as lot 93, a really choice EF 1794 C-9, was hammered down to a previously (we thought) retired collector. "Amore est aeternus"! A pretty 1795 C-1 EF40 brought a strong \$6000. The 95 C-2a choice AU brought \$16,000. I really liked lot 109, the 1795 C-5a with full dentilation and strong reverse. It brought \$3900, a price fully as strong as the reverse for a VF30 coin. Everyone loved the choice VF 1795 C-6b, lot 116. After the spirited bidding, it brought a remarkable \$27,600 to an increasingly famous New Jersey collector. The very ugly, but very authentic 1796 no pole lot 118 brought \$19,500. The pretty close to Au 1796 C-2 with pole brought \$63,250!

I was carrying a very strong bid on the beautiful 1803 C-2 lot 147. This was one of the "Baltimore Massacre" coins. Described there as "Brown with subdued blue highlights and simply beautiful"! It was priced there at \$4000 (quite a lot in 1983). For those of you unfamiliar, the Baltimore Massacre refers to the very significant collection of Half Cents formed over many years by a collector/dealer friend of Roger Cohen's. Many condition census pieces and remarkable die states were in the collection. Through an agreement with dealers Ron Guth, Steve Fischer, and Jim McGuigan the collection was to be offered first come, first served with the orders to be accepted by phone or mail no earlier than February 14, 1983. The collection was initially billed as the "Baltimore Collection" and was a nice photocopied list with descriptions, prices, and rules of engagement was sent out well in advance of the sale date. One collector called Ron Guth at 11:45 p.m. February 13th. Asked about the weather, about his health. Inquired about the well being of his baby daughter. "Hey, how about those Dodgers?" Then at the stroke of midnight: "I'll take these five half cents." R.G., that is Ron, had the

unpleasant duty to tell him the entire collection had been sold intact to a Michigan collector (Doc Lee!) As you can imagine this bending or breaking of the rules was considered a gross miscarriage of justice by many collectors. And thus came to be known as the St. Valentine's Day Massacre or the "Baltimore Massacre".

Well, what a difference twenty years makes. The loss to the 1983 collectors is the gain to collectors of 2003. I would presume all disappointment or bad feeling for 1983 has dissipated, though I have in the past been known to presume wrongly. I note in the copy of the "Baltimore Sale" I am using the note "JM wants" written in the margin next to the 1803 C-2. What could this mean? And who could this JM of twenty years ago be?

When the bidding on lot 147 began it became immediately apparent that my "JM" of twenty years ago retained an interest. Moreover, a number of kindred spirits shared his interest in the coin. Even the original owner of the Baltimore Collection tried to get back his dream coin. The bidding went racing past the \$4000 level, didn't hesitate at 10 and continued to a hammer of 18K, that is close to \$21,000. The Texas collector who I bought it for expresses his complete satisfaction with the coin and the price. "Why should this be worth less than an 1804 C-4 in EF?" Well, it's not any more!

Just a couple lots later another Baltimore Massacre coin came up. The 1803 C-2 F15 in a rare intermediate die state. This brought \$8000. How much is this die state worth? This coin's twin was sold for \$1725 as lot 146. But it was an early die state.

I bought several nice Draped Busts for stock. A nice borderline UNC 1803 C-3. A great 1804 C-4 CC#3 and the Manley plate coin. A couple 1804 C-6 die states. OOPS! I missed lot 194, the finest known terminal die state 1804 C-7. Who would pay almost \$14,000 for a die state? Perhaps the mysterious aforementioned "JM".

I bought a nice EF 1804 C-11 lot 217 for about \$2200. It seemed like a bargain since the last AU (Bill Weber's beautiful slider) brought around \$20,000. I bought a nice AU50 1806 C-2 small six with stems for \$8625. The nicest I have ever owned. I buy a pair of rare 1808 C-2 die states for a client. Then watch as the gem "60" 1808 C-3 sells for an astonishing \$17,250. My notes aren't clear here. I can read the first initial is a "J" but the second initial is definitely not an "M" and may be a "B". Does any one know this mysterious Half Cent collector JB. Ho, ho, ho.

A nice VF 1809 C-1 brought an extremely strong \$14,000 plus the juice while the essentially mint state 1809 C-2 brought a total of \$11,500. Lot 281, the 1811 2 star break, was, I thought, a much nicer than the tooled and burnished Schonwalter coin. But this actually brought a little less at \$10,350. Still I imagine the two starred break is clear enough

on either coin to satisfy most die state collectors. A nice run of proofs was highlighted by a gemmy first restrike at over \$11,000. These have finally been getting a little more attention recently.

The Half Cents overall brought very strong prices, almost comparable to the incomparable Weber sale.

The Large Cents started strong with the possible retuned 1793 S-9 EF45 bringing a very strong \$19,500. A few lots later the stone cold gem 1794 S-24 Ex. Jackman-Hines-Naftzger. Now in a PCGS MS 67 holder brought \$92,000. Does anyone know of a higher price at auction for a 1794 cent?

A recently discovered 1794 S-37, not pretty but rare brought \$10,350.

I had owned the pretty 1794 S-44 AU50 a couple times before. After some competition it went to a California collector of 94s for \$12,650. Wonder what I sold it for in 1994?

The rare 1795 NC2 struck over T.A.L. brought a fairly reasonable (I think) or a completely outrageous (CQR is \$4500) \$12,000.

One of the major highlights of this sale was the auction of the C. Douglas Smith-Robert Schuman 1798 cents. The first of the shoot, a 1798 S-144 VF35, probably the finest known brought close to \$35,000. Oooh, this was going to be rough! The next lot 1798 S-145 VF35 brought over \$5,000. The VF30 1798 S-147 brought over \$9,000. I brought the pretty 1798/7 S-152 (8625) and the exceptional 1798 S-154, third finest known (\$5,750). Then the finest known S-156 brought \$26,450. Then I bought the pretty S-158 (\$8,050). One of my favorites was the mint state 1798 S-160. A couple tiny spots, but clearly the finest known. It will have an appreciative home. Hey, at \$33,350 it could buy its own little house here in Oklahoma.

It's hard to narrow down the highlights. AU55 1798 S-164 \$28,750! 1798 S-173 MS60 \$25,000. 1798 S-178 VF30 \$27,600. How about an MS60 1798 S-181 at \$33,350! Wow!

But a few lots later another great ex CDS coin, the 1802 S-240, brought \$13,800. I bought a nice mint state 1803 S-250 for \$6,500+. Seemed cheap compared to the 98s! Later, the nice 1813 S-292 pretty close to AU for \$2,750. The middle dates have been so weak the last couple years. It has been a great time to buy middle dates, but a tough time to sell them. They were stronger here. The first lot of the second session (actually the first session ran so long we just kind of stood up, sat back down and started session two), 1816 N-1 VF30 I had ballparked at \$1,000, instead it brought a strong \$1,750.

I bought a beautiful (and I think rare) early die state 1816 N-9 for \$2,760. Not cheap but this brought about \$3,500 in the Frankenfield sale. Then a few lots later the beautiful Ex. C. Douglas Smith 1817 N-12 at \$5,750 (brought close to

\$7,000 in the March Wells sale).

More typically the nice VF 1818 N-4 brought over \$6,000 and a nice in my eyes AU 1818 N-8 brought \$1,150. The EF 1819 N-7 brought \$2,400. Hey, how old am I? I remember the day Peter Boisvert cherry picked this for \$150. A nice Randall Hoard 1819 N-9 MS63 brought \$1,955. That's a lot. I thought I semi-cherried the 1820 N-6 very sharp EF45+. A few lots later an 1821 N-2 with mint red, one of the famous 7 examples removed from the cornerstone of a Boston building in 1981 (the building was built in 1821). PCGS graded MS63RB brought over \$14,000.

I have never owned an 1822 N-14 (there are only 5 or 6 known). In contrast I have owned a half dozen 1830 N-9's and three 1834 N-7's. Well, now I own one. And you can, too. It's for sale somewhere in this catalog.

There were many nice middle dates and I heard several comments on the consistent high quality. What does a \$1,750 1828 R1 in AU55 look like? Well, I thought lot 726 looked like a pretty good deal on that level. But you would have to see the coin to understand.

Lot 802 is the only 1834 N-6 I have ever seen with mint red. At least two other bidders saw it as exceptional as well. It brought a strong \$9,200, lot 803 a lesser AU55 with a scratch brought a still strong \$2,400

The late dates seemed to be mostly Ex. Robbie Brown III coins that were being offered for resale. (Doc Lee sold off most of his late dates earlier.) But there were some great coins. A Portland area vintner got a fabulous coin in what is probably the finest known 1849 Cent of any variety. (And at a couple thousand less than in RSB.) Another finest known MDS 1851/81 sold for over \$8,500.

What a day. And what a great sale. Ron Guth did a fabulous job calling the sale. And of course the overall results were record breaking. But what made it a great sale was the quality of the participants. Over several days of lot viewing I heard comments again and again from the women Superior hires to show lots about how friendly and entertaining and nice the copper collectors were. And lot viewing was packed. Every flat space in the showroom was used to show lots. The library was opened for lot viewing and some of the offices. The day of the sale the room was full to overflowing. No chairs were available and it was standing room only. But no squabbling over space. In fact many people gave up their seats to half collectors saying they would trade back when the large cents came up. Well, you had to be there. Doc Lee did a great job of expressing it in the last paragraph of his bio. "I have and still do enjoy this wonderful hobby and especially the fellowship that I have had along the way. Time marches on, but I will always be able to look back upon this wonderful experience."

INTRODUCTION

This will be my first full list of 2003. I'm doing something a little different. Every coin in this list is a new purchase since my December list. There are many great new coins. Included are my purchases from the recent Schonwalter, EAC, Doc Lee, and Doug Smith sales. I hope you will find something to add to your collection.

I will be attending the ANA convention in Baltimore July 25-August 2nd. If you attend, please come by and see me. (Tables 622 and 624)

We have recently concluded a successful EAC sale. Also, May 23 we held the single largest early copper sale ever. The sale of the Doc Lee and C. Douglas Smith collections brought \$2.8 million dollars! We will be selling the Michael Arconti collection of large cent errors July 27th in Baltimore. Contact Bob Grellman, myself, or Superior (1-800-421-0754) to obtain a catalog. We will be producing a good for \$10 token to commemorate this sale. Just write and request an example.

Thanks,

Chris

1838 N-4 R2 PCGS MS65 RB \$1250.00

Excellent eye appeal in spite of the minor marks. EAC grade net MS60+.

1838 N-5 R1 MS60 \$ 550.00

Glossy medium brown with a splash of reddish chocolate toning at the dentils near stars 8 & 9 and another under the wreath. Lustrous bluish steel brown with 10% of the red remaining on the obverse, 20% on the reverse. The only marks are a small planchet chip on the throat and a collection of tiny low spots left of the date, both defects as truck. The dentils over TATE are flat due to a slightly thin planchet in that area. MDS. Ex. Anthony Terranova, M & G Auctions 1/96:444-Stuart MacDonald, Heritage 9/11/97:5280 (misattributed as N-5)-Dr. Wallace Lee.

1838 N-8 R1 MS60 \$ 275.00

The only sign of contact is a long, dull scuff in the field left of star 12., The most notable defect is a mint-made planchet lamination under star 4 and right of star 8. A tiny planchet clip weakens the dentils over star 10 and IC in AMERICA. M-LDS.
